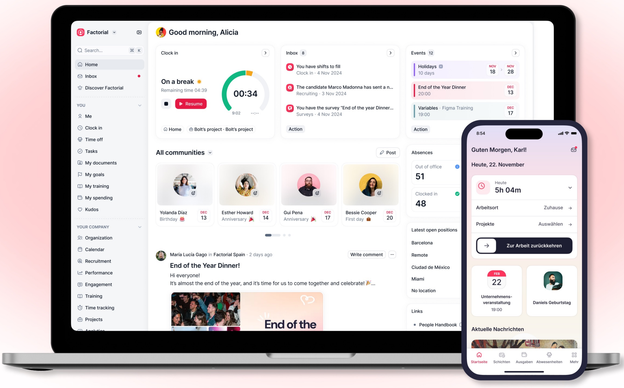
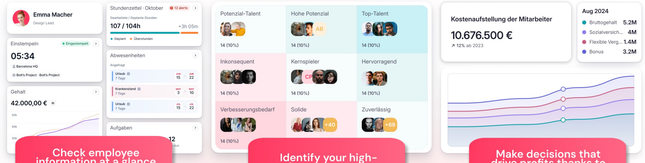
Factorial, the AI-powered business platform that connects all you need to manage your team





Check employee information at a glance for a quick and comprehensive overview

Identify your high-performers so you can invest in their growth

Make decisions that drive profits thanks to detailed cost breakdowns

"Shift planning was done manually via paper or Excel, lacking central access for the team. This meant there was no automated comparison between scheduled and actual hours."

Laura Meyer
HR Managerin

"Inefficient personnel management was a major hurdle for our day-to-day business. Because time tracking and leave management were manual, the entire process was slow and frequently led to mistakes."

Olivia Bauer
HR Generalist

"Before Factorial, nobody knew who was working when. It was hard to see if someone left early, and because of that, we couldn't always ensure we had the right number of people on shift."

Arthur Weber
Global Manager

Tailored plans for every need
The ideal package for everyone, based on your company's needs and industry

Continous improvement
Our weekly updates are driven by partner and customer feedback and thoroughly tested

Built for every company
Simple, intuitive, and user-friendly – so the entire team can benefit immediately

Insights that drive progress
Real-time insights give you a clear overview of your processes and enable informed decisions
